

Assignment 5:Begin a transaction, perform a series of INSERTs into 'orders', setting a SAVEPOINT after each, rollback to the second SAVEPOINT, and COMMIT the overall transaction

–We will BEGIN the transaction
BEGIN;

– We will INSERT a new record into the 'orders' table and set a SAVEPOINT
SAVEPOINT savepoint1;
INSERT INTO orders (OrderID, ProductID, Quantity, OrderDate)
VALUES (12345, 1001, 5, '2024-05-13');

– We will INSERT another record into the 'orders' table and set a SAVEPOINT
SAVEPOINT savepoint2;
INSERT INTO orders (OrderID, ProductID, Quantity, OrderDate)
VALUES (12346, 1002, 3, '2024-05-14');

– We will Rollback to the second SAVEPOINT
ROLLBACK TO SAVEPOINT savepoint2;

– We will COMMIT the overall transaction
COMMIT;
